_____		School Bus
_____		Transit (bus, train, taxi, etc.)
_____		Walk
_____		Bike
_____		Other (skateboard, scooter, etc.)

How many students are in class today: _____

For the teachers:

We are collecting data on how students get to and from school so that we can improve traffic conditions and make students safer. We appreciate your help in this program.

1. Please fill in the information about your class and the weather conditions on the day of the survey.
2. Ask your students "How they got to school today" and indicate the numbers in the appropriate section.
3. Each student should only answer once so the count is accurate.
4. Turn in your form to the front office.

Thank you for your help in collecting this information.
